ATTENTION!

CYBER DEFENDERS & INCIDENT RESPONDERS

We need your expertise!

WHAT WE ARE DOING

Conducting an experiment funded by the United States Air Force Research Laboratory, to objectively evaluate the effectiveness of visualizations to enhance performance of cyber defenders.

WHO IS ELIGIBLE

- Cyber defenders with 3 years real world experience
- College students who compete in cyber competitions

must be at least 18 years old

WHAT YOU WILL DO

Participants will be asked to use visualizations of data associated with potential cyber incidents and answer a series of questions. You will be asked to provide your feedback on the visualizations presented.

The experiment and training will be conducted online beginning in October 2017, no travel necessary. Your total time commitment is expected to be approximately 90 minutes.

We are measuring the value of the visualizations, not your skills. All information about the experiment participants will remain confidential. The data collected during the experiment, along with your feedback will be aggregated to assess and evaluate the impact of the visualizations on the process.

WHY YOU SHOULD DO THIS

Your skills can help move the research in the use of visualizations for cyber defense forward.

The expertise you have acquired through training and application are essential to understanding the visualizations, and your feedback is vital.

All we ask is your time, your expertise, and your opinion; there is no cost to participate.

If interested in participating, or for more information, visit us at www.SecureDecisions.com/WhyViz or email us at whyviz@securedecisions.com.
